Ecological Sustainability and Wisdom in East Asia for the Future

The 2nd East Asian Anthropology and Ethnology Forum

November 9_[WED] / 10_[THU], 2011

Lecture Hall, Research Institute for Humanity and Nature, Kyoto, Japan
総合地球環境学研究所 講演室

As the rapid industrial development under a globalised market, East Asia is now changing drastically in both ecologically and sociologically. Globalization has brought people material prosperity by economic growth, high technology of information and medical services, education and so on. But these activities have caused deterioration of environments and loss of indigenous cultures which have promised us sustainable livelihoods for millennia. We have to find out new ways of life which satisfy both sustainability and human welfare.

Under such circumstance, the role of anthropology and ethnology is becoming more and more important, as those disciplines have been focusing on: how people have adapted to the different natural environments, and how people have modified their ways of life under the historical and social changes.

Proposed Topics

1. Damaged or hazardous situation of environments and socio-economic drivers
2. Endangered ecosystem or species by human activities
3. Customary institutions of access to natural resources and traditional rules for management and utilization of natural resources
4. Cultural and spiritual identity of sea-coastal peoples, and traditional beliefs of their relationship with the environment
5. Traditional knowledge of forest products, including wood and non-wood products, food materials, fodder and medicine, housing and fuel wood
6. Traditional knowledge of environmental functions of pasturelands to maintain nomadic lives
7. Traditional methods and techniques of ecosystem management
8. Policy issues relating to traditional knowledge and culture

PROGRAM

Language: English

NOVEMBER 9 [WED], 2011 9:30-17:15

9:30- Registration 10:00- Opening Session

Session **1** | **Endangered Environment by Human Activities**
10:45-

NOVEMBER 10 [THU], 2011 9:30-18:00

Session **2** | **Wisdom of Futurability**
9:30-

Session **3** | **Concluding Session**
17:15- | **"Ecological Sustainability and Wisdom in East Asia for the Future"**

[参加お申し込み] E-mailまたはFAXにて下記にお申し込み下さい。

「東アジアにおける生態学的持続性とその知恵」参加氏名(フリガナ)、郵便番号、住所、電話番号、ご所属先、参加希望日時(11月9日・10日・両日)をご記入ください。定員になり次第締め切ります。
